## ARMAMENT SUMMARY

## GENERAL NOTES

**COVERAGE:** The Armament Summary covers vessels afloat and building on which USN ordnance has been mounted or authorized, including Navy, Coast Guard (65 feet and over) and Lend Lease. Small boats, including landing craft thus classified, and naval aircraft are covered as classes and not individually, by supplements issued separately.

**ARRANGEMENT:** Strict alphabetical arrangement by type symbols is followed throughout. Coast Guard vessels will be found as G types. Lend Lease vessels are listed separately in the back of the book. The Ordnance Vessel Register (see note below) provides an alphabetical index of names.

**ORDNANCE:** Turrets and gun mounts, (rather than guns), directors, radar and underwater ordnance are listed. It should be noted that for multiple mounts and turrets the quantity shown always refers to mounts or turrets, not to guns.

**MARKS & MODIFICATIONS:** These are shown so far as known, in the columns so headed. Mod. O is indicated by OO in the appropriate column, and an effort has been made to show Mod. O where it is particularly important that it be distinguished (as with 5" mounts Mark 37 for instance) and leave the mod. column blank where the mod. is unknown.

**VESSEL DATA:** Type symbol, number, name and completion dates of vessels are given. Completion dates are printed in the mark and mod. columns, the month in the mark column, the year in the mod. column and following the year a star (\*) if the vessel is completed. Dates for vessels building are from the current BuShips Basic List "A". For vessels completed from 1900 to 1909 the figure 19 is printed in the month column when the month is not known. For vessels completed before 1900, 18 or 17 as the case may be, is printed in the month column. Further data on vessels, including dimensions, home yards, fleet assignments, etc., may be obtained from the Ordnance Vessel Register.

**INSTALLED ARMAMENT:** The column so marked shows quantities as reported to the Bureau, a blank means that no report of installation had been received as of the date of the book. It is requested that any errors be reported direct to the Bureau by the ship or unit concerned, using any convenient means.

**TEMPORARY and ULTIMATE AUTHORIZED ARMAMENT:** The Ultimate Armament, except as noted, is the armament approved by the Chief of Naval Operations for ultimate installation. The Temporary Approved armament, except as noted, is the armament approved by the Chief of Naval Operations for temporary installation. In this edition of the Armament Summary the Temporary Approved column is the same as the Ultimate Approved column except where a different Temporary Armament has been directed.

Directives from CNO do not ordinarily specify marks and modifications of ordnance nor cover directors and radar.

In the absence of a directive, the Installed armament figures are repeated in the Temporary and Ultimate columns, but the statement "NO ARMAMENT DIRECTIVE" is added. In the absence of authorized ultimate armament, the temporary authorized armament is printed in the ultimate column.

Attention is invited to the desire of the Chief of Naval Operations that before installation of armament listed in the Armament Summary, the matter of armament approved for actual installation and the arrangement thereof be referred to the Department, if not already covered by specific instructions.

**LEND LEASE VESSELS:** Only USN ordnance on these vessels is shown. In general, their armament is not to be modified by the United States Navy, and the installed armament is printed as ultimate.

**TIME OF ISSUE:** Present plans are that the Armament Summary will be issued in January, March, May, July, September and November as of the 25th of the preceding months. Each issue will be complete and will supersede previous issues which should be destroyed as prescribed in Navy Regulations without report to the Bureau. The Aviation Ordnance and Small Boat Supplements will be revised separately and should be retained until new ones are received.

**WEEKLY SUPPLEMENT:** A confidential Weekly Supplement is sent to all those receiving the Armament Summary unless instructions are received to the contrary. This Supplement contains data on armament authorizations and status of vessels, but does not report changes in installed armament. The Weekly Supplements should be filed with the Armament Summary. On receipt of a new issue of the Armament Summary, changes affecting the preceding issue should be destroyed without report.

**DISTRIBUTION & ACCOUNTABILITY:** The Armament Summary is distributed to various desks in the Bureau of Ordnance and elsewhere in the Department, to Navy Yards and commands afloat and ashore. It is the Bureau's policy to distribute the publication to all authorized to receive confidential information of this type and having an established need; it is not ordinarily supplied, however, to individual commanders of vessels. The Armament Summary is not a registered publication, there is no accountability beyond the usual regulations for confidential non-registered publications. When no longer required copies should be destroyed without report to the Bureau. It is requested, however, that leather covers be returned if not needed.

ARMAMENT SUMMARY

GENERAL NOTES (Continued)

**ORDNANCE VESSEL REGISTER:** The Ordnance Vessel Register, issued in alternate months with the Armament Summary, is a necessary supplement to the latter and is sent to all holders unless other instructions are received. It contains lists of all Navy, Coast Guard and Lend Lease vessels, including those without armament, arranged by type and number, by date of completion and alphabetically by name. Lists of sunk and transferred vessels are also included. The building yard, home yard, fleet assignment, completion date, hull material, dimensions and speed of each vessel are given if available.

**OTHER AVAILABLE DATA:** In addition to the information shown in the Armament Summary the Bureau compiles in monthly reports of limited circulation, more complete ship armament records showing guns as well as mounts, small arms, additional fire control (computers, stable elements, various indicators and indicator-regulators, rangefinders, etc.), loading machines, smoke screen generators, etc. Merchant ships are also covered in these reports. Separate lists of each kind of equipment are likewise prepared. Because of the flexibility of the system employed, it is possible to make up separate lists of the armament of ships with selected fleet assignments, or types of equipment by fleet assignments, as for example, a list of all 5"/38 guns in the Atlantic Destroyer Force, lists by home yard, building yard, etc.

**SUGGESTIONS INVITED:** The format of the Armament Summary is not entirely settled and suggestions as to ordnance to be included or excluded, frequency of issue, page size, etc., are invited.

**SAMPLE PAGE:** There is reproduced below part of a page describing representative ships, with an explanation.

ARMAMENT SUMMARY

ARMAMENT SUMMARY  
By A. J. NARA Date 8-28-57

Table with columns: DESCRIPTION, QUANTITY, and various sub-columns for counts. It lists armaments for various ship classes, including descriptions like 'UC TRACK/W/S 600 OR 12 300LBS DC SINGLE DEPTH CHARGE PROJECTORS' and '3/50 DOUBLE PURPOSE MOUNTS'. The table is organized into sections (DE, NE, SE, etc.) and contains numerous rows of data.

DE's A and C (Bufile GWT and DET) types: An ultimate armament for these vessels is now under study. The ultimate armament shown is the temporary-approved armament. This applies to the following vessels: DE 3 - 11, 12 - 24, 27 - 30, 101 - 105, 112, 113, 122 - 174, 176, 180 - 197, 216 - 265, 302 - 307, 327 - 330, 339 - 376, 393 - 411.
