NAVY DEPARTMENT
BUREAU OF ORDNANCE
WASHINGTON, D. C.

25 July 1945

DECLASSIFIED
CONFIDENTIAL

1. The Ordnance Vessel Register dated 25 July 1945 supersedes issues dated 25 May 1945 and earlier.

2. The Ordnance Vessel Register is issued every other month, primarily for the use of the Bureau of Ordnance and Ordnance activities but will be made available to others authorized to receive the confidential information it contains. For a detailed explanation of the contents, abbreviations used and sources of the information contained, users of the Register are referred to the General Notes. It is requested that any suggestions concerning the publication, reports of error and similar matters be forwarded to the Bureau of Ordnance, Navy Department, Washington 25, D. C.

3. The Ordnance Vessel Register is a confidential but not a registered publication. It shall be safeguarded as required by United States Navy Regulations and the Registered Publication Manual. When no longer required, this and earlier issues shall be destroyed by burning. No report of destruction is required.

4. IT IS FORBIDDEN TO MAKE EXTRACTS FROM OR TO COPY THIS PUBLICATION WITHOUT SPECIFIC AUTHORITY FROM THE SECRETARY OF THE NAVY OR CHIEF OF NAVAL OPERATIONS, EXCEPT AS PROVIDED IN THE REGISTERED PUBLICATION MANUAL.

5. It is not intended that this publication shall be carried in aircraft for use therein.

G. F. HUSSEY, Jr.
Rear Admiral, U. S. Navy
Chief of the Bureau of Ordnance

DECLASSIFIED

This document contains information affecting the national defense of the United States within the meaning of the Espionage Act, 50 U. S. C., 31 and 32, as amended. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.

GENERAL: The Vessel Register is published every other month by the Bureau of Ordnance primarily for use by Ordnance activities. An effort has been made to include all Navy vessels, Coast Guard vessels and foreign naval vessels that receive U. S. Ordnance.

Questions regarding financial data should be addressed to Fi3 (extension 2317), questions relating to other data to PL3b (extension 63968). It is requested that any mistakes or omissions be similarly reported.

Inquiries concerning distribution may be made by telephone to Navy extension 63968 or by mail to The Chief of the Bureau of Ordnance (PL3b), Navy Department, Washington 25, D. C.

U.S. NAVY TYPES: Official type designations are used except that since only capital letters are available such forms as APc and LSM(R) are printed APC and LSMR.

COAST GUARD: The prefix G used in previous issues to distinguish Coast Guard vessels has been changed to W, and the designation system used herein is now officially authorized as standard nomenclature. Coast Guard vessels 65' and over except quarterbarges are listed. Named vessels (100' and over) have Navy types assigned with W preceding, and numbers used are the numerals of the visual call. Numbered vessels (under 100') are identified by 5-digit numbers, the first two showing length in feet, the last three the vessel number. Reserve vessels, with type designation WR, have identifying numbers not exceeding four digits, and no length is indicated. Fireboats are distinguished by F (appears in "Class" column) following the number.

LEND-LEASE: Vessels transferred to foreign powers are shown with U.S.N. type designations prefixed by B for British, R for Russian and other flags as shown on page 5. Certain foreign vessels armed by the United States are included but are distinguished from Lend-Lease transfers by the letter Z in the third column, marked "Class". As only capital letters and not more than four columns are available, combinations such as BLCI for British LCI(L) are used. Assignment of vessels under construction to the Royal Navy is shown by UK following the name, to the Russian Navy by RC and to the French Navy by FR. Month and year of transfer are shown in the column marked "Transfer Date", or "Home Yard" in the alphabetical index.

CLASS: The classes of certain vessels are shown by a one-letter code. A key to this code for combat ships and certain auxiliaries appears on pages 7 to 9.

NAME: The number of letters is limited to 20; abbreviations are used where the number exceeds this figure.

SHIPYARDS: The name and address of the yard (or its successor) where the keel of a ship was laid is indicated by a four-letter code. A key to this code appears on pages 10 to 17.

HOME YARDS AND FITTING-OUT YARDS: Home yards are shown by a four-letter code beginning with the letters NY, fitting-out yards with a code beginning FO. A key to both codes is included in the shipyard key, pages 10 to 17. Where the home yard is also the fitting-out yard, the latter is not separately indicated. Fitting-out yards other than Navy yards are not shown.

CONSTRUCTION: Figures in this column have the following meanings:

1 - steel hull and superstructure
2 - wood hull and superstructure, steel frames
3 - all wood except engines and equipment
4 - concrete hull, steel frames or reinforcing
5 - wood hull, steel superstructure and bulkheads
6 - steel hull, wood superstructure
7 - wood hull and superstructure, steel bulkheads
8 - iron hull
9 - wood hull, steel superstructure

FLEET ASSIGNMENT: A key to the fleet assignment code is printed on page 18.

FINANCIAL DATA: (See FINANCIAL NOTES on Page 19.)

COMPLETION DATES: These represent dates when vessels were or are to be completed and accepted by the Navy, or, for completed vessels acquired by the Navy for conversion, completion of actual construction as private vessels. Navy new construction dates are from the latest Basic List "A" of the Bureau of Ships, with corrections to date.

OFF LIST: Vessels marked CR in this column are those struck from the list, cancelled, reclassified, sunk, etc. They are not included in the net count of vessels of each type.

COMPLETED: A star in this column denotes that the vessel has been completed by the builder. The completion star is removed when CR is placed in the "Off List" column for vessels disposed of other than by sinking or by scrapping owing to battle damage.

TOTALS: After the last ship of each type, there appears in the "Completion Date" column a total of ships of that type on hand, and in the "Full-Load" column a total of ships of the type in the program. These are net totals with ships sunk, cancelled, etc., deducted. By adding the total of ships completed to the cumulative totals in the chronological list in the center of the book, the total ships to be complete in any future month can be obtained. A summary of vessels appears on page 6.

LENGTH OVERALL: The extreme length measured over the hull plating. This does not include an overhanging flight deck or net-handling horns.

EXTREME BEAM: The extreme beam measured over the hull plating, except for CV and CVB, for which the width of the flight deck is given.

MOLDED DEPTH: Where available, this figure is that defined in the ABS (American Bureau of Shipping) "Record". Where the ABS figure is not available, the figure given, except for aircraft carriers, is the height amidships from the bottom of the keel to the top of the freeboard deck. For carriers the height amidships from the bottom of the keel to the top of the flight deck is used.

FULL-LOAD DISPLACEMENT: For certain combatant ships (BB, CA, CL, CV, CVE, CVL, DD348 and above) this figure is the mean loaded displacement for the ship or for the class corresponding to the data to be used in FTP 218-1 (Confidential) when issued. For other ships, where available this figure is designed full-load displacement recommended by the Stability Section (Code 456) of the Bureau of Ships. Otherwise it is the designed full-load displacement for ocean condition.

FULL-LOAD DRAFT: This figure is the mean keel draft corresponding to the full-load displacement. It is not navigational draft.

ELECTRIC: Ship's service electric power at the switchboard is indicated by the following code:

0 - 120/208-volt 3-phase 60-cycle A.C.
1 - 440-volt 3-phase 60-cycle A.C.
2 - 230-volt D.C. with supplementary 440-volt 3-phase 60-cycle A.C.
3 - 115-volt D.C. with supplementary 440-volt 3-phase 60-cycle A.C.
4 - 230-volt 3-phase 60-cycle A.C.
5 - 230-volt D.C.
6 - 115-volt D.C.
7 - 230-volt single-phase 60-cycle A.C.
8 - 32-volt D.C.
9 - 28 1/2-volt D.C.
CR - miscellaneous electric power not covered above

The supplementary A.C. referred to is supplied on many ships by motor-generators of very limited capacity and may not be available for mount power drives. No attempt is made to show any supplementary power except 440-volt A.C., although most ships have 115 volts for lighting, etc. The following ships have 230-volt D.C. lighting: AF19, 40; AG33; AGS4; AP6, 177; IX110, 156, 157; PG53. All voltages are approximate.

A total of 193 LCIG's (including future conversions and some shown as LCIL's in this edition of the Vessel Register) are expected to receive 115 D.C./440 A.C. motor generators for 40-mm twin mount power drives. The numbers of the first 98 announced are as follows: 2,17-19,36,37,39-43,45,46,76,189-192,194-196, 220,233-237,398,401,403,408,412-415,417-421,428,506,514,516,517,528,530,534,538-548,556,563,570,573,574, 576-579,661-663,744-750,753,948,953-962,964,1014-1019,1060.

SPEED: For certain combatant vessels, speed is battle speed for the ship or the class as noted under Full-Load Displacement above. For other vessels maximum speed as reported by Ship Characteristics Cards is used, or, failing these data, design speed. Because of variations in the interpretation of "Speed", figures should be accepted with reserve. "Maximum sea speed" from Ship Characteristics Cards, rather than design speed is given for non-combatant vessels except for slower vessels whose design speed should approximate maximum sea speed. An asterisk in the speed column means non-self-propelled.

VESSELS LOST: Vessels, including Coast Guard and Lend Lease, reported lost by enemy action or perils of the sea from 1 September 1939 are listed on pages 267 to 281. These listings may be advance of official strikings from the Navy list, but no losses of classification higher than confidential are included. Totals for each type are shown in the column headed "Full-Load".

VESSEL DISPOSALS: This list, pages 282 to 316, includes cancellations, transfers, reclassifications, sales, returns, etc., from 1 September 1939 onward. "WSA" in the "Name" column means transferred to the War Shipping Administration for disposal. Numerals in "Fleet Assignment" column show month and year placed out of service.

ALPHABETICAL LIST: Following universal maritime practice, vessels are listed alphabetically by first name or word. Navy, Coast Guard, Lend Lease and sunk vessels are all included in the list, but former names and U.S. names of Lend Lease vessels renamed by foreign powers are left out.

SPECIAL LISTS: Attention is invited to the special lists that are made up regularly or as required, showing ships and their ordnance classified by fleet assignment, by home yard, by building yard, by completion date, etc.

PHOTOGRAPHS OF VESSELS: For photographs and small plans of vessels, users of the Vessel Register are referred to "ONI 54 Series U.S. Naval Vessels" (Restricted), "ONI 226 Allied Landing Craft and Ships" (Confidential) and "ONI 201 Warships of the British Commonwealth" (Restricted), obtainable from the Chief of Naval Operations (Op 16-P). "Types of Coast Guard Vessels" (Restricted), with photographs only, is obtainable from The Commandant (O), U. S. Coast Guard, Washington 25, D. C.

ARMAMENT SUMMARY: Attention is invited to a companion publication, the Armament Summary (Confidential), issued in alternate months with the Vessel Register, listing for every Navy, Coast Guard and Lend Lease vessel on hand and building, the turrets, gun mounts, directors, radar and underwater ordnance installed or to be installed, with marks and modifications.

IRNV						
Future dates or blanks in Expiration Date columns mean IRNV funds are available.						
Future expiration date:	43	2	43	3	6	46
Expiration date not yet known:	44	2	44	2		
NO IRNV FUNDS - O&OS OR OTHER FUNDS MUST BE USED						
Past dates or asterisks (*) in Expiration Date columns mean NO IRNV funds are available.						
Past expiration date:	41	1	41	3	10	44
or						
Past expiration date:	34	1	34	1		*
Prior to fiscal year 1925:		*	*			*
Maintenance BuShips, Coast Guard and Lend-Lease:						*
AUTHORIZATION PENDING						
(Blanks in all columns)						

FINANCIAL NOTES

AUTHORIZING ACT: The fiscal year in which each vessel was authorized is given in the column headed "YR.". The separate Acts within each fiscal year are numbered serially in the column headed "NO.". (See key to code numbers, page 18.)

APPROPRIATION ACT: The fiscal year in which the initial appropriation for each vessel was made is given in the colu headed "YR.". The title number of the Naval Appropriation Act within the fiscal year appears in the column headed "NO.", except where no title number was assigned in which case the appropriation is numbered serially within the y (See key to code numbers, page 19.)

EXPIRATION DATE: The column under this heading gives the Month and Calendar Year in which the vessel expires for further obligation under the appropriation Increase and Replacement of Naval Vessels (Armor, Armament and Ammuniti or Emergency Construction).

A star or a past date in this column means that NO IRNV funds are available for obligation. If additional material has been directed for procurement, Ordnance and Ordnance Stores or other funds must be used.

A future date means the IRNV funds are available until that date. A blank means that the expiration date is not yet known and funds are available till further notice.

Expenditures for vessels open for obligation or expenditure under the appropriation IRNV (AAA) must be completed within 15 months of the obligation expiration date (See Nav ltr. FS/L10-3(25)(410410)P, dated May 10, 1941). Expenditures for vessels under the appropriation IRNV (EC) must be completed by 31 December 1945 (P.L. 92 approved 26 June 1943).
